Task Description

Topic: Home library management system

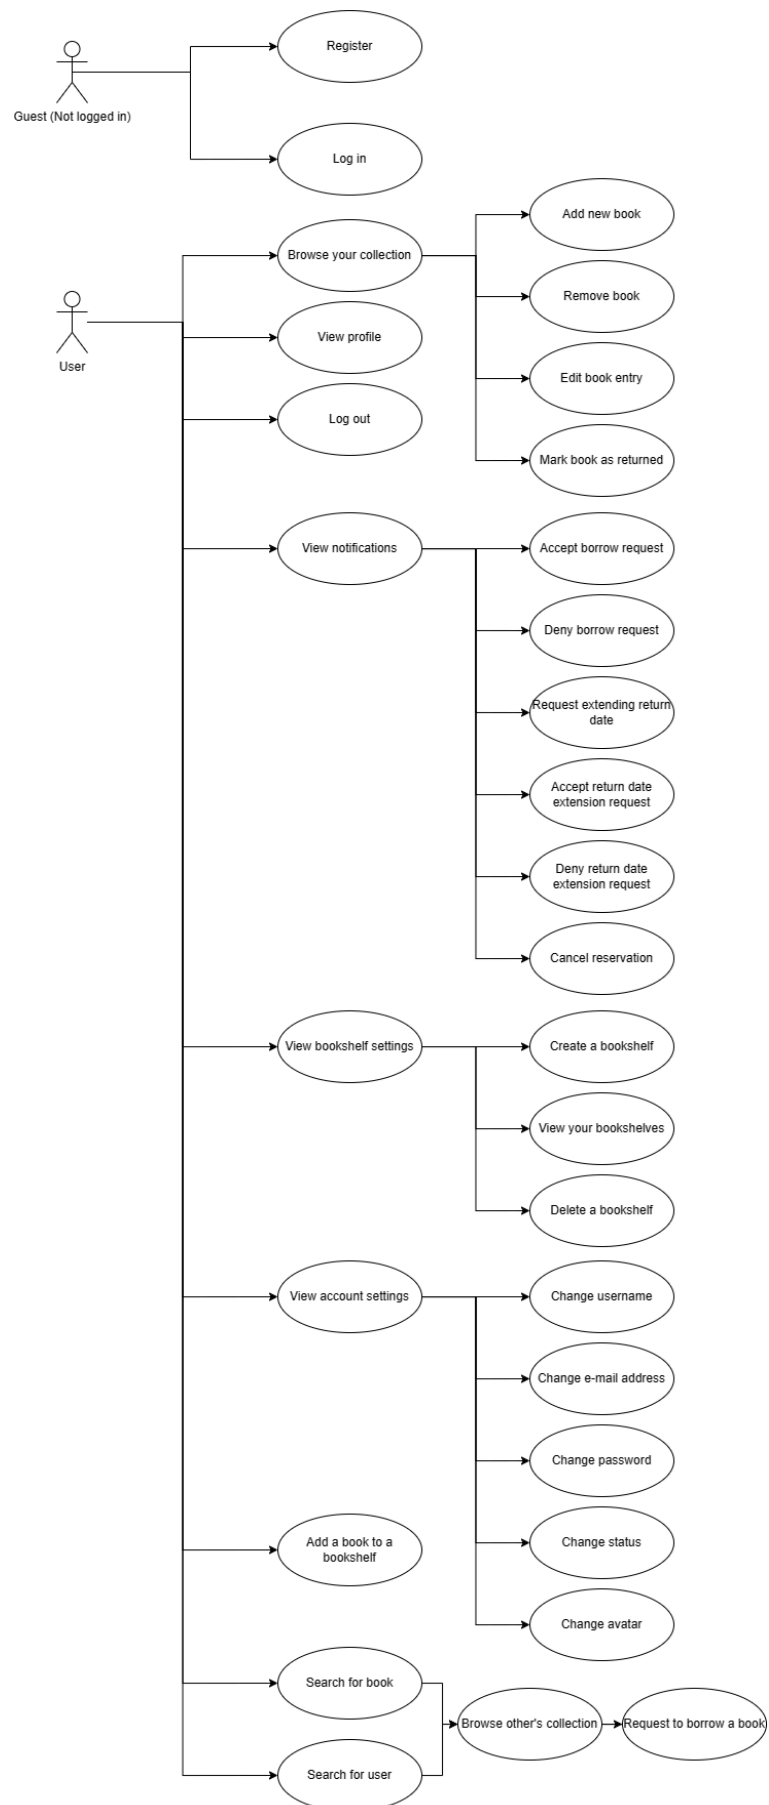

Description: The system user is a book lover reading and collecting books and journals. Every bibliographic artifact is registered, also with respect to its location on bookshelves. Books and journals may be lent to friends (other system users), and these facts are registered too. The system should enable users to search over the global collection of the whole community, reserving books, borrowing and returning them.

Analysis

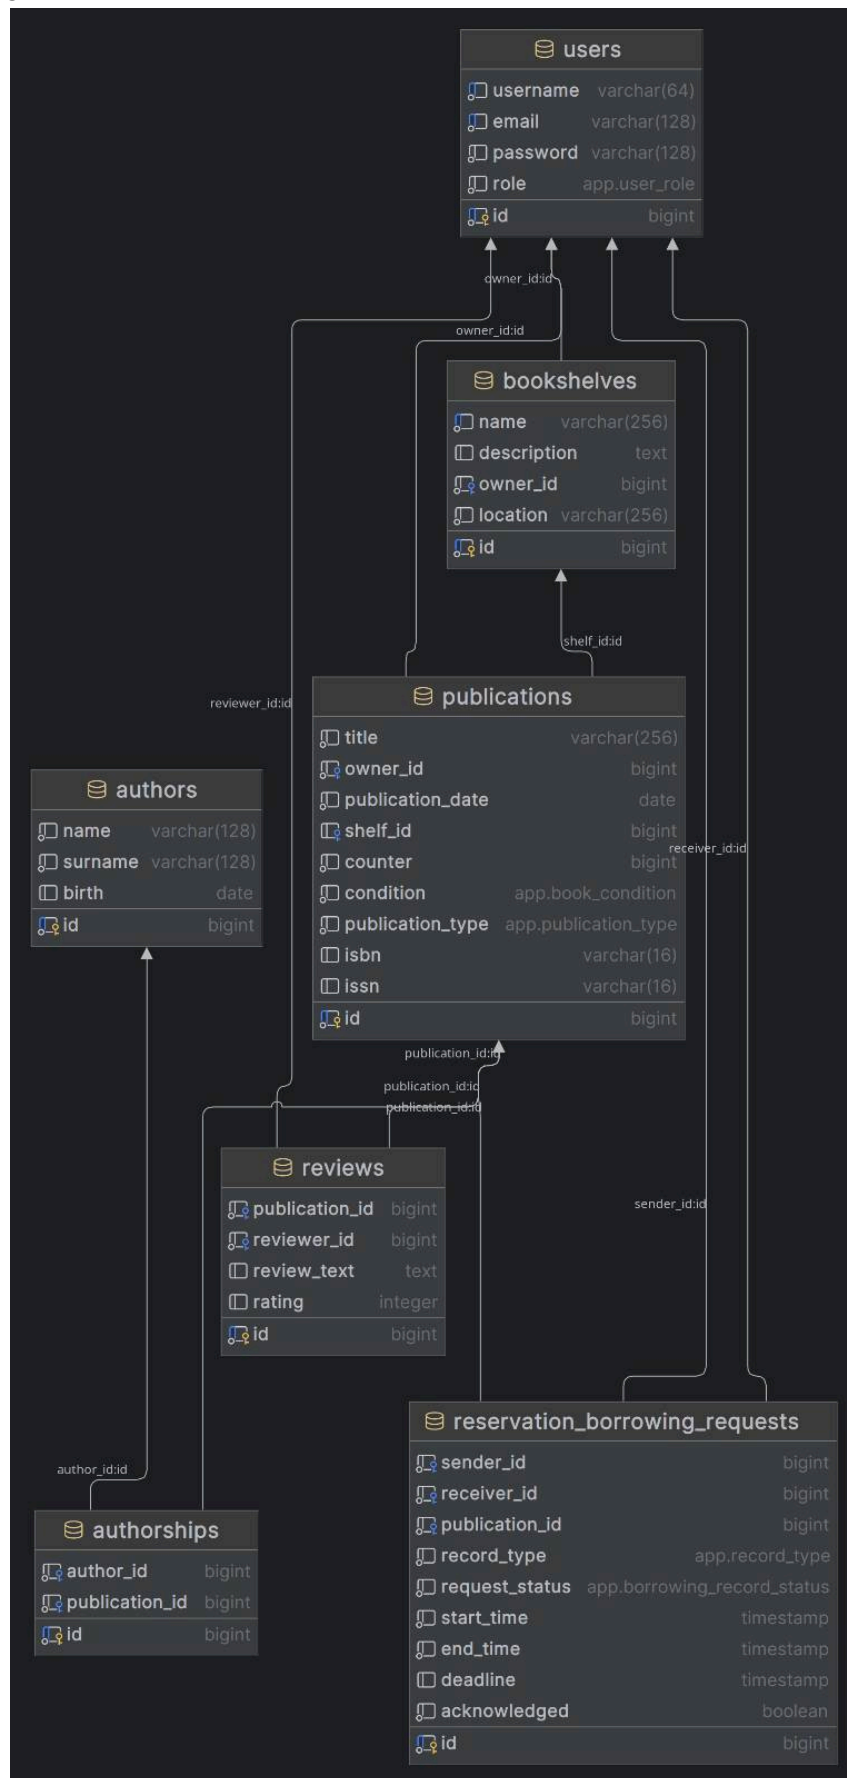

The UML class diagram at the beginning of work at the project is presented below.

Use case diagram:

Database diagram:

Architecture and Technology

We decided to design the project in Java with the use of servlets framework. As the database, we used PostgreSQL.

We were considering SpringBoot, but it appeared this would require too much time spent for learning the technology itself, so we renounced this idea and chose to use simple Java servlets.

External Specification

Logging in

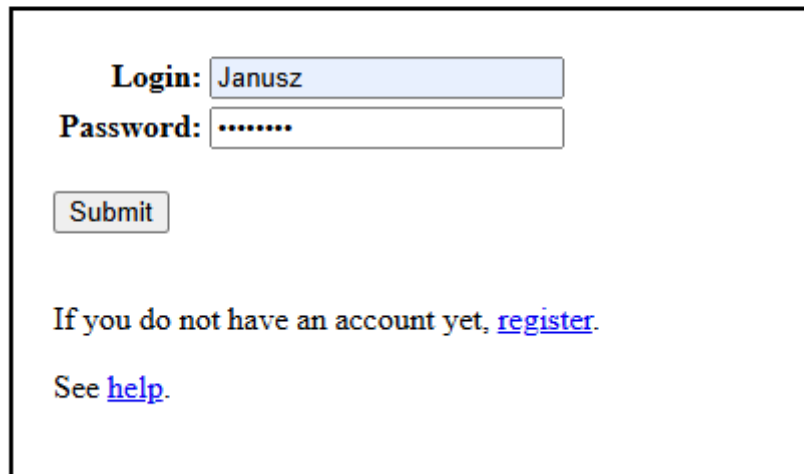

The user is greeted with the welcome page where they can log in. There is also a link leading to the registration page. One may also see the help page.

On login success, the user passes to the homepage.

On login failure, one is redirected to the log-in-again page. It looks essentially like that below, so its screenshot was skipped.

Home Library · Welcome!

Log in

The screenshot shows a login form within a black rectangular border. At the top, it says "Login:" followed by a text input field containing "Janusz". Below that, it says "Password:" followed by a text input field containing seven dots. Under the password field is a "Submit" button. At the bottom of the form, there is a line of text: "If you do not have an account yet, [register](#)." and another line: "See [help](#)."

Registration

When the user wants to register a new account, they shall provide the username, the email and the password. The password shall be repeated in order to be confirmed. It is also mandatory to accept the regulations and terms.

On registration success the user passes to the homepage.

On failure, the user is directed back to the same page. They are shown the errors that were made.

Register

Username:

Email:

Password:

Confirm:

☐ I accept the regulations and terms.

If you already have an account, [log in](#).

See [help](#).

Homepage

The homepage is whence one may:

- search a publication,
- browse one's collection,
- view one's notification,
- open bookshelf settings,
- go to account settings,
- add a book to one's bookshelf,
- see the help page.

Typically, it is possible to come back home from the other pages. (To avoid redundancy, this information will be skipped while discussing particular pages.)

Home Library · Homepage

Hello, Janusz!

[Click](#) to browse your collection.

[Click](#) to view your notifications.

[Click](#) to open your bookshelf settings.

[Click](#) to go to account settings.

[Click](#) to add a book to your bookshelf.

See [help](#).

Browsing Own Collection

In this page, the user can view their own publications. The data that are shown are: the title, the year of publication, ISBN/ISSN and the authors.

Hence, one may proceed to **adding**, **editing** and **removing** a publication.

Home Library · Your Publications:

Your publications:

Title	Year of publication	ISBN/ISSN	Authors
Common Book	2024	000-000-0000-000	George Orwell, Adam Mickiewicz, Jerzy Kiler
Don Matteo	2024	222-222-2222-222	Jaciek Marnot, Zbingiew Safari, Kay Jay
Książka PL	2024	888-888-8888-888	Jerzy Kiler, Siara Siarzewski, Ferdynand Lipski
Animal Farm	1945	9780452284241	George Orwell

[Add](#) a publication.

[Edit](#) a publication.

[Remove](#) a publication.

Go back [home](#).

Adding Publication

To add a new publication, one shall provide its: title (without quotation marks), date of publication, condition (selected from a dropdown list), type (book/journal), ISBN/ISSN and authors. The authors cannot be added directly.

To add an author, one may either input their name and surname, or choose an author from the list of those that are already present in the system. In both cases, one confirms with the button “Add the author”.

Press “Add the publication...” button when all data has been provided.

Home Library · Add a Publication

Title:	<input type="text" value="Jak nauczyć psa przeklinać"/>	
Date of publication:	<input type="text" value="01 . 03 . 2024"/>	
Condition:	<input type="text" value="Like new"/>	
Publication type:	<input type="text" value="Book"/>	
ISBN/ISSN:	<input type="text" value="010 030 2024 010"/>	
Authors:	<input type="text"/>	

Add the author

Select Author

Select Author

George Orwell

Adam Mickiewicz

Jerzy Kiler

Kay Jay O'Nail

Jaciek Marnot

Adam Niekciarz

Zbingiew Safari

Wikołaj Milczyński

Kay Jay

Siostra Anastazja

Siara Siarzewski

Ferdynand Lipski

Caesar Milan

Joe Mama

Add the publication to your collection

Go back [home](#).

On completion, the user is redirected to the browsing page.

Editing Publication

To edit a publication, one needs to first select it in the dropdown list on the top of the form. It is mandatory. Optionally, one may press the “Fill” button to have the form filled with the data of the publication (otherwise one would need to fill all the data oneself).

Authors are added in the same manner as discussed in the previous chapter. To remove the author from the list, one needs to select them from the list and press “Remove”.

Home Library · Edit a Publication

Książka PL ▼		Fill
New title:	Książka PL	
New date of publication:	16 . 05 . 2024 	
New condition:	Very good ▼	
New publication type:	Book ▼	
New ISBN/ISSN:	888-888-8888-888	
New Authors:	Jerzy Kiler; Ferdynand Lipski; Stefan "Siara" Siarzewski	
	Select author to remove ▼	
	Remove	
	Select author to add ▼	
	Name to add Surname to add	
	Add	

Edit

Go back [home](#).

In the picture, one can see the book “Książka PL” edited so that it is no longer in “Excellent” condition but only “Very good”, and the author “Siara Siarzewski” was corrected to “Stefan "Siara" Siarzewski”.

Removing Publication

Removing a publication is very simple. The user needs only to press the button “Remove”. Removal can be continued as long as one wishes (the user is not automatically directed back upon removal). When finished, one comes back via the link “Return to browse”.

Home Library · Your Publications:

Your publications:

Title	Year of publication	ISBN/ISSN	Authors	Action
Don Matteo	2024	222-222-2222-222	Jaciej Marnot, Zbingiew Safari, Kay Jay	<button>Remove</button>

Animal Farm	1945	9780452284241	George Orwell	<button>Remove</button>
Jak nauczyć psa przeklinać	2024	010 030 2024 010	Caesar Milan	<button>Remove</button>

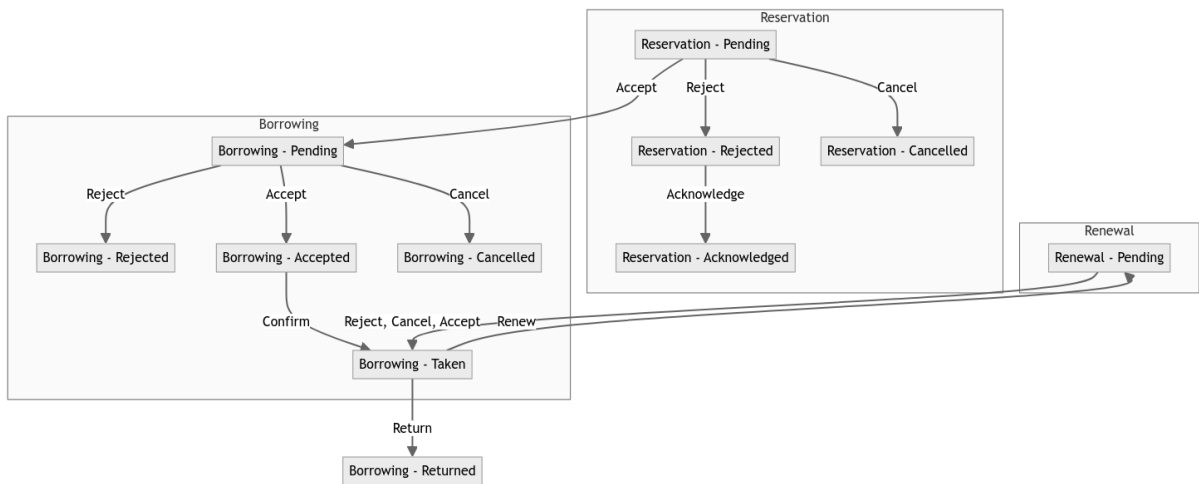

[Return](#) to browse.

Go back [home](#).

Viewing Notifications

The application provides a notification system that keeps users informed about the status of their requests related to reservations, borrowing, and renewals of publications. The notification page displays all incoming and outgoing requests, along with their current status and available actions.

Diagram

Reservation Notifications

- Pending: A new reservation request awaiting action. Options: Reject or Cancel the request.
- Rejected: The reservation request has been rejected. Option: Acknowledge the rejection.

Borrowing Notifications

- Pending: A new borrowing request awaiting action. Options: Accept, Reject, or Cancel the request.
- Accepted: The borrowing request has been accepted. Option: Confirm borrowing to mark the item as Taken.
- Taken: The publication has been borrowed. Options: Return the item or initiate a Renewal request.

Renewal Notifications

- Pending: A renewal request awaiting action. Options: Accept, Reject, or Cancel the renewal.

Home Library · Notifications

Sender	Receiver	Type	Publication	Date	Status	Action
Janusz	Jeremiasz	borrowing Request	Dziady	2024-06-01 00:00:00	Pending	<i>Waiting for receiver to borrow</i>
Kay Jay	Jeremiasz	reservation Request	Dziady	2024-06-06 00:00:00	Pending	<button>Accept</button> <button>Reject</button>
Janusz	Jeremiasz	reservation Request	2005	2024-05-16 09:08:23.689485	Pending	<button>Accept</button> <button>Reject</button>
Jeremiasz	Janusz	reservation Request	Animal Farm	2024-05-21 00:00:00	Pending	<button>Cancel</button>

Users can take appropriate actions on their notifications, such as accepting or rejecting requests, confirming borrowing, returning items, or acknowledging rejections. This system ensures that all parties involved are aware of the current status of their requests and can respond accordingly.

Account Settings

The user can change the following parameters of their account: login, password, email address and status. The screenshot below presents the form for introducing the changes.

In order not to change the username, email address or status unchanged, one needs to leave the values as they are. In order not to change the password, one should leave the fields for the new password proposal and the new password confirmation empty.

To confirm introducing the changes, the user must input the current password.

Home Library · Account Settings

Username:	Janusz
New password:	leave blank not to change
Confirm password:	leave blank not to change
Email address:	janusz.biznesu@januszex.pl
Status:	Hi! I am using Home Library!

Input your current password to authorize the changes:

Go back [home](#).

Bookshelf Settings:

In the Bookshelf settings, users can view all bookshelves with their assigned books, add new shelves, delete shelves, and add books to a bookshelf.

Home Library · Your Bookshelf:

My first shelf

Animal Farm

Don Matteo

Książ. PL

1001 sposo. jak zjeść ciast. i ...

Jak naucz. psa przek.

test

Common Book

Favorite Books

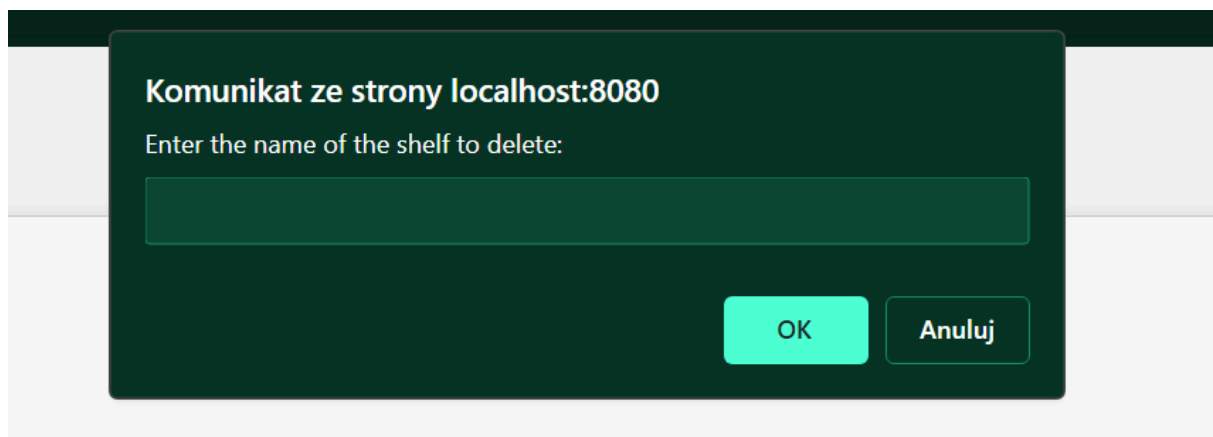

Adding a new Shelf:

To add a new shelf, click on the "Add Shelf" button. A prompt will appear, requesting the user to enter a name for the new bookshelf. After entering the name, click "OK" to create the shelf.

Deleting a Shelf:

To delete a shelf, click on the "Delete Shelf" button. A prompt will appear, requesting the user to enter the name of the shelf to be deleted. After entering the name, click "OK" to delete the shelf.

Adding a Book to a Bookshelf:

To add a book to a bookshelf, click the "Add Book" button in the bookshelf settings or button in the Homepage. The user will then need to select a bookshelf from the list of available bookshelves and choose the book to be added. After making the selections, click "OK" to add the book to the selected shelf.

Home Library · Add Book to Bookshelf:

Internal Specification

Description of functions and classes is moved to the appendix.

Conclusions

The development of our Home Library Management System successfully created an intuitive solution for book enthusiasts to manage their collections and facilitate borrowing among friends. The system supports cataloging bibliographic artifacts, tracking their physical location, and managing the lending process efficiently.

We achieved a user-friendly interface, efficient data management with Java servlets and PostgreSQL, and core functionalities such as search, reservation, borrowing, and returning.

This project has established a solid foundation for a functional, user-centric library management system, balancing simplicity and efficiency while providing opportunities for future improvements.

Protected Member Functions

- void [processRequest](#) (HttpServletRequest request, HttpServletResponse response) throws ServletException, IOException
- void [doGet](#) (HttpServletRequest request, HttpServletResponse response) throws ServletException, IOException
- void [doPost](#) (HttpServletRequest request, HttpServletResponse response) throws ServletException, IOException

5.1.1 Detailed Description

Servlet for adding a book to a bookshelf.

5.1.2 Constructor & Destructor Documentation

5.1.2.1 AddBookToBookshelf()

```
homelibrary.servlets.AddBookToBookshelf.AddBookToBookshelf ()
```

Default constructor.

5.1.3 Member Function Documentation

5.1.3.1 doGet()

```
void homelibrary.servlets.AddBookToBookshelf.doGet (  
    HttpServletRequest request,  
    HttpServletResponse response) throws ServletException, IOException [protected]
```

Handles the HTTP GET method.

Parameters

<i>request</i>	servlet request
<i>response</i>	servlet response

Exceptions

<i>ServletException</i>	if a servlet-specific error occurs
<i>IOException</i>	if an I/O error occurs

5.1.3.2 doPost()

```
void homelibrary.servlets.AddBookToBookshelf.doPost (  
    HttpServletRequest request,  
    HttpServletResponse response) throws ServletException, IOException [protected]
```

Handles the HTTP POST method.

Parameters

<i>request</i>	servlet request
<i>response</i>	servlet response

Exceptions

<i>ServletException</i>	if a servlet-specific error occurs
<i>IOException</i>	if an I/O error occurs

5.1.3.3 getServletInfo()

```
String homelibrary.servlets.AddBookToBookshelf.getServletInfo ()
```

Returns a short description of the servlet.

Returns

a String containing servlet description

5.1.3.4 processRequest()

```
void homelibrary.servlets.AddBookToBookshelf.processRequest (  
    HttpServletRequest request,  
    HttpServletResponse response) throws ServletException, IOException [protected]
```

Processes requests for both HTTP GET and POST methods.

Parameters

<i>request</i>	servlet request
<i>response</i>	servlet response

Exceptions

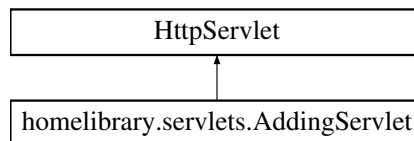

<i>ServletException</i>	if a servlet-specific error occurs
<i>IOException</i>	if an I/O error occurs

The documentation for this class was generated from the following file:

- C:/Users/user/Git/2024_DSA_S4_GWOZDZ/app/src/main/java/homelibrary/servlets/AddBookToBookshelf.↔
java

5.2 homelibrary.servlets.AddingServlet Class Reference

Inheritance diagram for homelibrary.servlets.AddingServlet:

Public Member Functions

- [AddingServlet](#) ()
- String [getServletInfo](#) ()

Protected Member Functions

- void [processRequest](#) (HttpServletRequest request, HttpServletResponse response) throws ServletException↔, IOException
- void [doGet](#) (HttpServletRequest request, HttpServletResponse response) throws ServletException, IOException
- void [doPost](#) (HttpServletRequest request, HttpServletResponse response) throws ServletException, IOException

5.2.1 Detailed Description

The servlet executing addition of a book, in response to the site printed by [AddServlet](#).

5.2.2 Constructor & Destructor Documentation

5.2.2.1 AddingServlet()

```
homelibrary.servlets.AddingServlet.AddingServlet ()
```

Default constructor.

5.2.3 Member Function Documentation

5.2.3.1 doGet()

```
void homelibrary.servlets.AddingServlet.doGet (  
    HttpServletRequest request,  
    HttpServletResponse response) throws ServletException, IOException [protected]
```

Handles the HTTP GET method.

Parameters

<i>request</i>	servlet request
<i>response</i>	servlet response

Exceptions

<i>ServletException</i>	if a servlet-specific error occurs
<i>IOException</i>	if an I/O error occurs

5.2.3.2 doPost()

```
void homelibrary.servlets.AddingServlet.doPost (  
    HttpServletRequest request,  
    HttpServletResponse response) throws ServletException, IOException [protected]
```

Handles the HTTP POST method.

Parameters

<i>request</i>	servlet request
<i>response</i>	servlet response

Exceptions

<i>ServletException</i>	if a servlet-specific error occurs
<i>IOException</i>	if an I/O error occurs

5.2.3.3 getServletInfo()

```
String homelibrary.servlets.AddingServlet.getServletInfo ()
```

Returns a short description of the servlet.

Returns

a String containing servlet description

5.2.3.4 processRequest()

```
void homelibrary.servlets.AddingServlet.processRequest (  
    HttpServletRequest request,  
    HttpServletResponse response) throws ServletException, IOException [protected]
```

Adds a book to the database. In case of success, redirects to [BrowseServlet](#). Otherwise, adds errors as request attribute and redirects back to [AddServlet](#).

Parameters

<i>request</i>	servlet request
<i>response</i>	servlet response

Exceptions

<i>ServletException</i>	if a servlet-specific error occurs
<i>IOException</i>	if an I/O error occurs

The documentation for this class was generated from the following file:

- C:/Users/user/Git/2024_DSA_S4_GWOZDZ/app/src/main/java/homelibrary/servlets/AddingServlet.java

5.3 homelibrary.servlets.AddServlet Class Reference

Inheritance diagram for homelibrary.servlets.AddServlet:

Public Member Functions

- [AddServlet](#) ()
- String [getServletInfo](#) ()

Protected Member Functions

- void `processRequest` (HttpServletRequest request, HttpServletResponse response) throws ServletException, IOException
- void `doGet` (HttpServletRequest request, HttpServletResponse response) throws ServletException, IOException
- void `doPost` (HttpServletRequest request, HttpServletResponse response) throws ServletException, IOException

5.3.1 Detailed Description

Servlet responsible for preparing the site with form for adding a book.

Author

Kay Jay O'Nail

5.3.2 Constructor & Destructor Documentation

5.3.2.1 AddServlet()

```
homelibrary.servlets.AddServlet.AddServlet ()
```

Default constructor.

5.3.3 Member Function Documentation

5.3.3.1 doGet()

```
void homelibrary.servlets.AddServlet.doGet (
    HttpServletRequest request,
    HttpServletResponse response) throws ServletException, IOException [protected]
```

Handles the HTTP GET method.

Parameters

<i>request</i>	servlet request
<i>response</i>	servlet response

Exceptions

<i>ServletException</i>	if a servlet-specific error occurs
<i>IOException</i>	if an I/O error occurs

5.3.3.2 doPost()

```
void homelibrary.servlets.AddServlet.doPost (
    HttpServletRequest request,
    HttpServletResponse response) throws ServletException, IOException [protected]
```

Handles the HTTP POST method.

Parameters

<i>request</i>	servlet request
<i>response</i>	servlet response

Exceptions

<i>ServletException</i>	if a servlet-specific error occurs
<i>IOException</i>	if an I/O error occurs

5.3.3.3 getServletInfo()

```
String homelibrary.servlets.AddServlet.getServletInfo ()
```

Returns a short description of the servlet.

Returns

a String containing servlet description

5.3.3.4 processRequest()

```
void homelibrary.servlets.AddServlet.processRequest (  
    HttpServletRequest request,  
    HttpServletResponse response) throws ServletException, IOException [protected]
```

Writes the HMTL site to the response. The site contains a form for adding a book.

Parameters

<i>request</i>	servlet request
<i>response</i>	servlet response

Exceptions

<i>ServletException</i>	if a servlet-specific error occurs
<i>IOException</i>	if an I/O error occurs

The documentation for this class was generated from the following file:

- C:/Users/user/Git/2024_DSA_S4_GWOZDZ/app/src/main/java/homelibrary/servlets/AddServlet.java

5.4 homelibrary.servlets.Author Class Reference

Public Member Functions

- [Author](#) (String [name](#), String [surname](#))

Public Attributes

- final String [name](#)
- final String [surname](#)

5.4.1 Detailed Description

Class representing an author.

5.4.2 Constructor & Destructor Documentation

5.4.2.1 Author()

```
homelibrary.servlets.Author.Author (  
    String name,  
    String surname)
```

Constructor. Assigns the final values to the properties.

Parameters

<i>name</i>	Name of the author.
<i>surname</i>	Surname of the author.

5.4.3 Member Data Documentation

5.4.3.1 name

```
final String homelibrary.servlets.Author.name
```

Name of the author.

5.4.3.2 surname

```
final String homelibrary.servlets.Author.surname
```

Surname of the author.

The documentation for this class was generated from the following file:

- C:/Users/user/Git/2024_DSA_S4_GWOZDZ/app/src/main/java/homelibrary/servlets/Author.java

5.5 homelibrary.servlets.Bookshelf Class Reference

Inheritance diagram for homelibrary.servlets.Bookshelf:

Public Member Functions

- [Bookshelf](#) ()
- String [getServletInfo](#) ()

Protected Member Functions

- void [processRequest](#) (HttpServletRequest request, HttpServletResponse response) throws ServletException, IOException
- void [doGet](#) (HttpServletRequest request, HttpServletResponse response) throws ServletException, IOException
- void [doPost](#) (HttpServletRequest request, HttpServletResponse response) throws ServletException, IOException

5.5.1 Detailed Description

Servlet for handling the bookshelf.

5.5.2 Constructor & Destructor Documentation

5.5.2.1 Bookshelf()

```
homelibrary.servlets.Bookshelf.Bookshelf ()
```

Default constructor.

5.5.3 Member Function Documentation

5.5.3.1 doGet()

```
void homelibrary.servlets.Bookshelf.doGet (  
    HttpServletRequest request,  
    HttpServletResponse response) throws ServletException, IOException [protected]
```

Handles the HTTP GET method.

Parameters

<i>request</i>	servlet request
<i>response</i>	servlet response

Exceptions

<i>ServletException</i>	if a servlet-specific error occurs
<i>IOException</i>	if an I/O error occurs

5.5.3.2 doPost()

```
void homelibrary.servlets.Bookshelf.doPost (  
    HttpServletRequest request,  
    HttpServletResponse response) throws ServletException, IOException [protected]
```

Handles the HTTP POST method.

Parameters

<i>request</i>	servlet request
<i>response</i>	servlet response

Exceptions

<i>ServletException</i>	if a servlet-specific error occurs
<i>IOException</i>	if an I/O error occurs

5.5.3.3 getServletInfo()

```
String homelibrary.servlets.Bookshelf.getServletInfo ()
```

Returns a short description of the servlet.

Returns

a String containing servlet description

5.5.3.4 processRequest()

```
void homelibrary.servlets.Bookshelf.processRequest (  
    HttpServletRequest request,  
    HttpServletResponse response) throws ServletException, IOException [protected]
```

Processes requests for both HTTP GET and POST methods.

Parameters

<i>request</i>	servlet request
<i>response</i>	servlet response

Exceptions

<i>ServletException</i>	if a servlet-specific error occurs
<i>IOException</i>	if an I/O error occurs

The documentation for this class was generated from the following file:

- C:/Users/user/Git/2024_DSA_S4_GWOZDZ/app/src/main/java/homelibrary/servlets/Bookshelf.java

5.6 homelibrary.servlets.BrowseServlet Class Reference

Inheritance diagram for homelibrary.servlets.BrowseServlet:

Public Member Functions

- [BrowseServlet](#) ()
- String [getServletInfo](#) ()

Protected Member Functions

- void [processRequest](#) (HttpServletRequest request, HttpServletResponse response) throws ServletException, IOException
- void [doGet](#) (HttpServletRequest request, HttpServletResponse response) throws ServletException, IOException
- void [doPost](#) (HttpServletRequest request, HttpServletResponse response) throws ServletException, IOException

5.6.1 Detailed Description

Servlet that prints the site with the collection of the user's publications and provides links to other pages.

5.6.2 Constructor & Destructor Documentation

5.6.2.1 BrowseServlet()

```
homelibrary.servlets.BrowseServlet.BrowseServlet ()
```

Default constructor.

5.6.3 Member Function Documentation

5.6.3.1 doGet()

```
void homelibrary.servlets.BrowseServlet.doGet (  
    HttpServletRequest request,  
    HttpServletResponse response) throws ServletException, IOException [protected]
```

Handles the HTTP GET method.

Parameters

<i>request</i>	servlet request
<i>response</i>	servlet response

Exceptions

<i>ServletException</i>	if a servlet-specific error occurs
<i>IOException</i>	if an I/O error occurs

5.6.3.2 doPost()

```
void homelibrary.servlets.BrowseServlet.doPost (  
    HttpServletRequest request,  
    HttpServletResponse response) throws ServletException, IOException [protected]
```

Handles the HTTP POST method.

Parameters

<i>request</i>	servlet request
<i>response</i>	servlet response

Exceptions

<i>ServletException</i>	if a servlet-specific error occurs
<i>IOException</i>	if an I/O error occurs

5.6.3.3 getServletInfo()

```
String homelibrary.servlets.BrowseServlet.getServletInfo ()
```

Returns a short description of the servlet.

Returns

a String containing servlet description

5.6.3.4 processRequest()

```
void homelibrary.servlets.BrowseServlet.processRequest (
    HttpServletRequest request,
    HttpServletResponse response) throws ServletException, IOException [protected]
```

Prints the site with the collection of the user's publications and provides links to other pages.

Parameters

<i>request</i>	servlet request
<i>response</i>	servlet response

Exceptions

<i>ServletException</i>	if a servlet-specific error occurs
<i>IOException</i>	if an I/O error occurs

The documentation for this class was generated from the following file:

- C:/Users/user/Git/2024_DSA_S4_GWOZDZ/app/src/main/java/homelibrary/servlets/BrowseServlet.java

5.7 homelibrary.servlets.ChangeAccountSettingsServlet Class Reference

Inheritance diagram for homelibrary.servlets.ChangeAccountSettingsServlet:

Public Member Functions

- [ChangeAccountSettingsServlet \(\)](#)
- [String getServletInfo \(\)](#)

Protected Member Functions

- void [processRequest](#) (HttpServletRequest request, HttpServletResponse response) throws ServletException, IOException
- void [doGet](#) (HttpServletRequest request, HttpServletResponse response) throws ServletException, IOException
- void [doPost](#) (HttpServletRequest request, HttpServletResponse response) throws ServletException, IOException

5.7.1 Detailed Description

Servlet that prepares the page for changing settings of the user's account.

5.7.2 Constructor & Destructor Documentation

5.7.2.1 ChangeAccountSettingsServlet()

```
homelibrary.servlets.ChangeAccountSettingsServlet.ChangeAccountSettingsServlet ()
```

Default constructor.

5.7.3 Member Function Documentation

5.7.3.1 doGet()

```
void homelibrary.servlets.ChangeAccountSettingsServlet.doGet (
    HttpServletRequest request,
    HttpServletResponse response) throws ServletException, IOException [protected]
```

Handles the HTTP GET method.

Parameters

<i>request</i>	servlet request
<i>response</i>	servlet response

Exceptions

<i>ServletException</i>	if a servlet-specific error occurs
<i>IOException</i>	if an I/O error occurs

5.7.3.2 doPost()

```
void homelibrary.servlets.ChangeAccountSettingsServlet.doPost (
    HttpServletRequest request,
    HttpServletResponse response) throws ServletException, IOException [protected]
```

Handles the HTTP POST method.

Parameters

<i>request</i>	servlet request
<i>response</i>	servlet response

Exceptions

<i>ServletException</i>	if a servlet-specific error occurs
<i>IOException</i>	if an I/O error occurs

5.7.3.3 getServletInfo()

```
String homelibrary.servlets.ChangeAccountSettingsServlet.getServletInfo ()
```

Returns a short description of the servlet.

Returns

a String containing servlet description

5.7.3.4 processRequest()

```
void homelibrary.servlets.ChangeAccountSettingsServlet.processRequest (  
    HttpServletRequest request,  
    HttpServletResponse response) throws ServletException, IOException [protected]
```

Writes the page for changing account settings.

Parameters

<i>request</i>	servlet request
<i>response</i>	servlet response

Exceptions

<i>ServletException</i>	if a servlet-specific error occurs
<i>IOException</i>	if an I/O error occurs

The documentation for this class was generated from the following file:

- C:/Users/user/Git/2024_DSA_S4_GWOZDZ/app/src/main/java/homelibrary/servlets/ChangeAccountSettingsServlet.java

5.8 homelibrary.servlets.ChangingAccountSettingsServlet Class Reference

Inheritance diagram for homelibrary.servlets.ChangingAccountSettingsServlet:

Public Member Functions

- [ChangingAccountSettingsServlet](#) ()
- String [getServletInfo](#) ()

Protected Member Functions

- void [processRequest](#) (HttpServletRequest request, HttpServletResponse response) throws ServletException, IOException
- void [doGet](#) (HttpServletRequest request, HttpServletResponse response) throws ServletException, IOException
- void [doPost](#) (HttpServletRequest request, HttpServletResponse response) throws ServletException, IOException

5.8.1 Detailed Description

Servlet that executes the change of the user's account settings.

5.8.2 Constructor & Destructor Documentation

5.8.2.1 ChangingAccountSettingsServlet()

```
homelibrary.servlets.ChangingAccountSettingsServlet.ChangingAccountSettingsServlet ()
```

Default constructor.

5.8.3 Member Function Documentation

5.8.3.1 doGet()

```
void homelibrary.servlets.ChangingAccountSettingsServlet.doGet (
    HttpServletRequest request,
    HttpServletResponse response) throws ServletException, IOException [protected]
```

Handles the HTTP GET method.

Parameters

<i>request</i>	servlet request
<i>response</i>	servlet response

Exceptions

<i>ServletException</i>	if a servlet-specific error occurs
<i>IOException</i>	if an I/O error occurs

5.8.3.2 doPost()

```
void homelibrary.servlets.ChangingAccountSettingsServlet.doPost (  
    HttpServletRequest request,  
    HttpServletResponse response) throws ServletException, IOException [protected]
```

Handles the HTTP POST method.

Parameters

<i>request</i>	servlet request
<i>response</i>	servlet response

Exceptions

<i>ServletException</i>	if a servlet-specific error occurs
<i>IOException</i>	if an I/O error occurs

5.8.3.3 getServletInfo()

```
String homelibrary.servlets.ChangingAccountSettingsServlet.getServletInfo ()
```

Returns a short description of the servlet.

Returns

a String containing servlet description

5.8.3.4 processRequest()

```
void homelibrary.servlets.ChangingAccountSettingsServlet.processRequest (  
    HttpServletRequest request,  
    HttpServletResponse response) throws ServletException, IOException [protected]
```

Connects with the database and updates the data that are required to be changed.

Parameters

<i>request</i>	servlet request
<i>response</i>	servlet response

Exceptions

<i>ServletException</i>	if a servlet-specific error occurs
<i>IOException</i>	if an I/O error occurs

The documentation for this class was generated from the following file:

- C:/Users/user/Git/2024_DSA_S4_GWOZDZ/app/src/main/java/homelibrary/servlets/ChangingAccountSettingsServlet.java

5.9 homelibrary.servlets.DatabaseConnectionData Class Reference

Public Member Functions

- [DatabaseConnectionData](#) ()

Static Public Attributes

- static final String [DATABASE_URL](#) = "jdbc:postgresql://dsa-sec04.postgres.database.azure.com:5432/home_library"
- static final String [DATABASE_USERNAME](#) = "dsa"
- static final String [DATABASE_PASSWORD](#) = "b^&!78ieyvcKKzAce4tkNZi4qcrivKsA9@9W4KomsS\$\$B5yEmoCx#XpJmWSZn2msRxbo^B#toja*rWipEFDhquDp8rTvtbw7dxMie4%9gYqKTzr%&ht\$hB\$RXSA4p*&&"

5.9.1 Detailed Description

Class for storing database connection data.

5.9.2 Constructor & Destructor Documentation

5.9.2.1 DatabaseConnectionData()

```
homelibrary.servlets.DatabaseConnectionData.DatabaseConnectionData ()
```

Default constructor.

5.9.3 Member Data Documentation

5.9.3.1 DATABASE_PASSWORD

```
final String homelibrary.servlets.DatabaseConnectionData.DATABASE_PASSWORD = "b^!78ieyvcKKz↵  
Ace4tkNZi4qcrivKsA9@9W4KomsS$B5yEmoCx#XpJmWSZn2msRxbo^B#toja*rWipEFDhquDp8rTvtbw7dxMie4%9g↵  
YqKTzr%&ht$hB$RXSA4p*&&" [static]
```

Database password

5.9.3.2 DATABASE_URL

```
final String homelibrary.servlets.DatabaseConnectionData.DATABASE_URL = "jdbc:postgresql↵  
://dsa-sec04.postgres.database.azure.com:5432/home_library" [static]
```

Database URL

5.9.3.3 DATABASE_USERNAME

```
final String homelibrary.servlets.DatabaseConnectionData.DATABASE_USERNAME = "dsa" [static]
```

Database username

The documentation for this class was generated from the following file:

- C:/Users/user/Git/2024_DSA_S4_GWOZDZ/app/src/main/java/homelibrary/servlets/DatabaseConnection↵
Data.java

5.10 homelibrary.servlets.DSAServlet Class Reference

Inheritance diagram for homelibrary.servlets.DSAServlet:

Public Member Functions

- [DSAServlet\(\)](#)
- [String getServletInfo\(\)](#)

Protected Member Functions

- void `processRequest` (HttpServletRequest request, HttpServletResponse response) throws ServletException, IOException
- void `doGet` (HttpServletRequest request, HttpServletResponse response) throws ServletException, IOException
- void `doPost` (HttpServletRequest request, HttpServletResponse response) throws ServletException, IOException
- String `getOwnerId` (HttpServletRequest request)
- String `getNickname` (HttpServletRequest request)
- void `executeUpdate` (String query) throws SQLException
- ResultSet `executeQuery` (String query) throws SQLException

5.10.1 Detailed Description

Base class for servlets in the application

5.10.2 Constructor & Destructor Documentation

5.10.2.1 DSAServlet()

```
homelibrary.servlets.DSAServlet.DSAServlet ()
```

Default constructor.

5.10.3 Member Function Documentation

5.10.3.1 doGet()

```
void homelibrary.servlets.DSAServlet.doGet (
    HttpServletRequest request,
    HttpServletResponse response) throws ServletException, IOException [protected]
```

Handles the HTTP GET method.

Parameters

<i>request</i>	servlet request
<i>response</i>	servlet response

Exceptions

<i>ServletException</i>	if a servlet-specific error occurs
<i>IOException</i>	if an I/O error occurs

5.10.3.2 doPost()

```
void homelibrary.servlets.DSAServlet.doPost (
    HttpServletRequest request,
    HttpServletResponse response) throws ServletException, IOException [protected]
```

Handles the HTTP POST method.

Parameters

<i>request</i>	servlet request
<i>response</i>	servlet response

Exceptions

<i>ServletException</i>	if a servlet-specific error occurs
<i>IOException</i>	if an I/O error occurs

5.10.3.3 executeQuery()

```
ResultSet homelibrary.servlets.DSAServlet.executeQuery (  
    String query) throws SQLException [protected]
```

Execute a query and return the result set

Parameters

<i>query</i>	the query to execute
--------------	----------------------

Returns

the result set

Exceptions

<i>SQLException</i>	if an error occurs
---------------------	--------------------

5.10.3.4 executeUpdate()

```
void homelibrary.servlets.DSAServlet.executeUpdate (  
    String query) throws SQLException [protected]
```

Execute an update query

Parameters

<i>query</i>	the query to execute
--------------	----------------------

Exceptions

<i>SQLException</i>	if an error occurs
---------------------	--------------------

5.10.3.5 getNickname()

```
String homelibrary.servlets.DSAServlet.getNickname (  
    HttpServletRequest request) [protected]
```

Get the nickname from the session

Parameters

<i>request</i>	the request object
----------------	--------------------

Returns

the nickname

5.10.3.6 getOwnerId()

```
String homelibrary.servlets.DSAServlet.getOwnerId (  
    HttpServletRequest request) [protected]
```

Get the owner id from the session

Parameters

<i>request</i>	the request object
----------------	--------------------

Returns

the owner id

5.10.3.7 getServletInfo()

```
String homelibrary.servlets.DSAServlet.getServletInfo ()
```

Returns a short description of the servlet.

Returns

a String containing servlet description

5.10.3.8 processRequest()

```
void homelibrary.servlets.DSAServlet.processRequest (  
    HttpServletRequest request,  
    HttpServletResponse response) throws ServletException, IOException [protected]
```

Processes requests for both HTTP GET and POST methods.

Parameters

<i>request</i>	servlet request
<i>response</i>	servlet response

Exceptions

<i>ServletException</i>	if a servlet-specific error occurs
<i>IOException</i>	if an I/O error occurs

Reimplemented in [homelibrary.servlets.EditingServlet](#), [homelibrary.servlets.NotificationManagementServlet](#), and [homelibrary.servlets.NotificationServlet](#).

The documentation for this class was generated from the following file:

- C:/Users/user/Git/2024_DSA_S4_GWOZDZ/app/src/main/java/homelibrary/servlets/DSAServlet.java

5.11 homelibrary.servlets.EditServlet Class Reference

Inheritance diagram for homelibrary.servlets.EditServlet:

Classes

- class **PublicationData**

Public Member Functions

- [EditServlet](#) ()
- String [getServletInfo](#) ()

Protected Member Functions

- void [processRequest](#) (HttpServletRequest request, HttpServletResponse response) throws ServletException, IOException
- void [doGet](#) (HttpServletRequest request, HttpServletResponse response) throws ServletException, IOException
- void [doPost](#) (HttpServletRequest request, HttpServletResponse response) throws ServletException, IOException

5.11.1 Detailed Description

The servlet that writes page for editing a publication.

5.11.2 Constructor & Destructor Documentation

5.11.2.1 EditServlet()

```
homelibrary.servlets.EditServlet.EditServlet ()
```

Default constructor.

5.11.3 Member Function Documentation

5.11.3.1 doGet()

```
void homelibrary.servlets.EditServlet.doGet (  
    HttpServletRequest request,  
    HttpServletResponse response) throws ServletException, IOException [protected]
```

Handles the HTTP GET method.

Parameters

<i>request</i>	servlet request
<i>response</i>	servlet response

Exceptions

<i>ServletException</i>	if a servlet-specific error occurs
<i>IOException</i>	if an I/O error occurs

5.11.3.2 doPost()

```
void homelibrary.servlets.EditServlet.doPost (  
    HttpServletRequest request,  
    HttpServletResponse response) throws ServletException, IOException [protected]
```

Handles the HTTP POST method.

Parameters

<i>request</i>	servlet request
<i>response</i>	servlet response

Exceptions

<i>ServletException</i>	if a servlet-specific error occurs
<i>IOException</i>	if an I/O error occurs

5.11.3.3 `getServletInfo()`

```
String homelibrary.servlets.EditServlet.getServletInfo ()
```

Returns a short description of the servlet.

Returns

a String containing servlet description

5.11.3.4 `processRequest()`

```
void homelibrary.servlets.EditServlet.processRequest (
    HttpServletRequest request,
    HttpServletResponse response) throws ServletException, IOException [protected]
```

Prints the page for editing a publication.

Parameters

<i>request</i>	servlet request
<i>response</i>	servlet response

Exceptions

<i>ServletException</i>	if a servlet-specific error occurs
<i>IOException</i>	if an I/O error occurs

The documentation for this class was generated from the following file:

- C:/Users/user/Git/2024_DSA_S4_GWOZDZ/app/src/main/java/homelibrary/servlets/EditServlet.java

5.12 homelibrary.servlets.EdittingServlet Class Reference

5.12.1 Detailed Description

Servlet for executing the editing of a book.

5.12.2 Constructor & Destructor Documentation

5.12.2.1 EditingServlet()

```
homelibrary.servlets.EditingServlet.EditingServlet ()
```

Default constructor.

5.12.3 Member Function Documentation

5.12.3.1 processRequest()

```
void homelibrary.servlets.EditingServlet.processRequest (
    HttpServletRequest request,
    HttpServletResponse response) throws ServletException, IOException [protected]
```

Processes requests for both HTTP GET and POST methods.

Parameters

<i>request</i>	servlet request
<i>response</i>	servlet response

Exceptions

<i>ServletException</i>	if a servlet-specific error occurs
<i>IOException</i>	if an I/O error occurs

Reimplemented from [homelibrary.servlets.DSAServlet](#).

The documentation for this class was generated from the following file:

- C:/Users/user/Git/2024_DSA_S4_GWOZDZ/app/src/main/java/homelibrary/servlets/EditingServlet.java

5.13 homelibrary.servlets.HomeServlet Class Reference

Inheritance diagram for homelibrary.servlets.HomeServlet:

Public Member Functions

- [HomeServlet](#) ()
- String [getServletInfo](#) ()

Protected Member Functions

- void [processRequest](#) (HttpServletRequest request, HttpServletResponse response) throws ServletException, IOException
- void [doGet](#) (HttpServletRequest request, HttpServletResponse response) throws ServletException, IOException
- void [doPost](#) (HttpServletRequest request, HttpServletResponse response) throws ServletException, IOException

5.13.1 Detailed Description

Servlet that prints the homepage.

5.13.2 Constructor & Destructor Documentation

5.13.2.1 HomeServlet()

```
homelibrary.servlets.HomeServlet.HomeServlet ()
```

Default constructor.

5.13.3 Member Function Documentation

5.13.3.1 doGet()

```
void homelibrary.servlets.HomeServlet.doGet (  
    HttpServletRequest request,  
    HttpServletResponse response) throws ServletException, IOException [protected]
```

Handles the HTTP GET method.

Parameters

<i>request</i>	servlet request
<i>response</i>	servlet response

Exceptions

<i>ServletException</i>	if a servlet-specific error occurs
<i>IOException</i>	if an I/O error occurs

5.13.3.2 doPost()

```
void homelibrary.servlets.HomeServlet.doPost (  
    HttpServletRequest request,  
    HttpServletResponse response) throws ServletException, IOException [protected]
```

Handles the HTTP POST method.

Parameters

<i>request</i>	servlet request
<i>response</i>	servlet response

Exceptions

<i>ServletException</i>	if a servlet-specific error occurs
<i>IOException</i>	if an I/O error occurs

5.13.3.3 getServletInfo()

```
String homelibrary.servlets.HomeServlet.getServletInfo ()
```

Returns a short description of the servlet.

Returns

a String containing servlet description

5.13.3.4 processRequest()

```
void homelibrary.servlets.HomeServlet.processRequest (  
    HttpServletRequest request,  
    HttpServletResponse response) throws ServletException, IOException [protected]
```

Prints the homepage.

Parameters

<i>request</i>	Servlet request
<i>response</i>	Servlet response

Exceptions

<i>ServletException</i>	if a servlet-specific error occurs
<i>IOException</i>	if an I/O error occurs

The documentation for this class was generated from the following file:

- C:/Users/user/Git/2024_DSA_S4_GWOZDZ/app/src/main/java/homelibrary/servlets/HomeServlet.java

5.14 homelibrary.servlets.ImageServlet Class Reference

Inheritance diagram for homelibrary.servlets.ImageServlet:

**Public Member Functions**

- [ImageServlet](#) ()
- String [getServletInfo](#) ()

Protected Member Functions

- void [processRequest](#) (HttpServletRequest request, HttpServletResponse response) throws ServletException, IOException
- void [doGet](#) (HttpServletRequest request, HttpServletResponse response) throws ServletException, IOException
- void [doPost](#) (HttpServletRequest request, HttpServletResponse response) throws ServletException, IOException

5.14.1 Detailed Description

Servlet for handling user's avatar image.

5.14.2 Constructor & Destructor Documentation

5.14.2.1 ImageServlet()

```
homelibrary.servlets.ImageServlet.ImageServlet ()
```

Default constructor.

5.14.3 Member Function Documentation

5.14.3.1 doGet()

```
void homelibrary.servlets.ImageServlet.doGet (  
    HttpServletRequest request,  
    HttpServletResponse response) throws ServletException, IOException [protected]
```

Handles the HTTP GET method.

Parameters

<i>request</i>	servlet request
<i>response</i>	servlet response

Exceptions

<i>ServletException</i>	if a servlet-specific error occurs
<i>IOException</i>	if an I/O error occurs

5.14.3.2 doPost()

```
void homelibrary.servlets.ImageServlet.doPost (  
    HttpServletRequest request,  
    HttpServletResponse response) throws ServletException, IOException [protected]
```

Handles the HTTP POST method.

Parameters

<i>request</i>	servlet request
<i>response</i>	servlet response

Exceptions

<i>ServletException</i>	if a servlet-specific error occurs
<i>IOException</i>	if an I/O error occurs

5.14.3.3 `getServletInfo()`

```
String homelibrary.servlets.ImageServlet.getServletInfo ()
```

Returns a short description of the servlet.

Returns

a String containing servlet description

5.14.3.4 `processRequest()`

```
void homelibrary.servlets.ImageServlet.processRequest (  
    HttpServletRequest request,  
    HttpServletResponse response) throws ServletException, IOException [protected]
```

Processes requests for both HTTP GET and POST methods.

Parameters

<i>request</i>	servlet request
<i>response</i>	servlet response

Exceptions

<i>ServletException</i>	if a servlet-specific error occurs
<i>IOException</i>	if an I/O error occurs

The documentation for this class was generated from the following file:

- C:/Users/user/Git/2024_DSA_S4_GWOZDZ/app/src/main/java/homelibrary/servlets/ImageServlet.java

5.15 homelibrary.main.resources.JakartaEE10Resource Class Reference

Public Member Functions

- [JakartaEE10Resource](#) ()
- Response [ping](#) ()

5.15.1 Detailed Description

Jakarta EE 10 Resource

Since

Jakarta EE 10

5.15.2 Constructor & Destructor Documentation

5.15.2.1 JakartaEE10Resource()

```
homelibrary.main.resources.JakartaEE10Resource.JakartaEE10Resource ()
```

Default constructor.

5.15.3 Member Function Documentation

5.15.3.1 ping()

```
Response homelibrary.main.resources.JakartaEE10Resource.ping ()
```

Ping Jakarta EE

Returns

a response

The documentation for this class was generated from the following file:

- C:/Users/user/Git/2024_DSA_S4_GWOZDZ/app/src/main/java/homelibrary/main/resources/JakartaEE10Resource.java

5.16 homelibrary.main.JakartaRestConfiguration Class Reference

Inheritance diagram for homelibrary.main.JakartaRestConfiguration:

Public Member Functions

- [JakartaRestConfiguration](#) ()

5.16.1 Detailed Description

Configures Jakarta RESTful Web Services for the application.

Author

Juneau

5.16.2 Constructor & Destructor Documentation

5.16.2.1 JakartaRestConfiguration()

`homelibrary.main.JakartaRestConfiguration.JakartaRestConfiguration ()`

Default constructor.

The documentation for this class was generated from the following file:

- `C:/Users/user/Git/2024_DSA_S4_GWOZDZ/app/src/main/java/homelibrary/main/JakartaRestConfiguration.↵
java`

5.17 homelibrary.servlets.LoginServlet Class Reference

Inheritance diagram for `homelibrary.servlets.LoginServlet`:

Public Member Functions

- [LoginServlet \(\)](#)
- `String` [getServletInfo \(\)](#)

Protected Member Functions

- `void` [processRequest](#) (`HttpServletRequest` request, `HttpServletResponse` response) throws `ServletException`, `IOException`
- `void` [doGet](#) (`HttpServletRequest` request, `HttpServletResponse` response) throws `ServletException`, `IOException`
- `void` [doPost](#) (`HttpServletRequest` request, `HttpServletResponse` response) throws `ServletException`, `IOException`

5.17.1 Detailed Description

Servlet that

5.17.2 Constructor & Destructor Documentation

5.17.2.1 LoginServlet()

`homelibrary.servlets.LoginServlet.LoginServlet ()`

Default constructor.

5.17.3 Member Function Documentation

5.17.3.1 doGet()

```
void homelibrary.servlets.LoginServlet.doGet (  
    HttpServletRequest request,  
    HttpServletResponse response) throws ServletException, IOException [protected]
```

Handles the HTTP GET method.

Parameters

<i>request</i>	servlet request
<i>response</i>	servlet response

Exceptions

<i>ServletException</i>	if a servlet-specific error occurs
<i>IOException</i>	if an I/O error occurs

5.17.3.2 doPost()

```
void homelibrary.servlets.LoginServlet.doPost (  
    HttpServletRequest request,  
    HttpServletResponse response) throws ServletException, IOException [protected]
```

Handles the HTTP POST method.

Parameters

<i>request</i>	servlet request
<i>response</i>	servlet response

Exceptions

<i>ServletException</i>	if a servlet-specific error occurs
<i>IOException</i>	if an I/O error occurs

5.17.3.3 getServletInfo()

```
String homelibrary.servlets.LoginServlet.getServletInfo ()
```

Returns a short description of the servlet.

Returns

a String containing servlet description

5.17.3.4 processRequest()

```
void homelibrary.servlets.LoginServlet.processRequest (  
    HttpServletRequest request,  
    HttpServletResponse response) throws ServletException, IOException [protected]
```

Processes requests for both HTTP GET and POST methods.

Parameters

<i>request</i>	Servlet request
<i>response</i>	Servlet response

Exceptions

<i>ServletException</i>	if a servlet-specific error occurs
<i>IOException</i>	if an I/O error occurs

The documentation for this class was generated from the following file:

- C:/Users/user/Git/2024_DSA_S4_GWOZDZ/app/src/main/java/homelibrary/servlets/LoginServlet.java

5.18 `homelibrary.servlets.NotificationManagementServlet` Class Reference

Inheritance diagram for `homelibrary.servlets.NotificationManagementServlet`:

Public Member Functions

- [NotificationManagementServlet](#) ()

Public Member Functions inherited from [homelibrary.servlets.DSAServlet](#)

- [DSAServlet](#) ()
- String [getServletInfo](#) ()

Protected Member Functions

- void [processRequest](#) (HttpServletRequest request, HttpServletResponse response) throws ServletException, IOException

Protected Member Functions inherited from [homelibrary.servlets.DSAServlet](#)

- void [doGet](#) (HttpServletRequest request, HttpServletResponse response) throws ServletException, IOException
- void [doPost](#) (HttpServletRequest request, HttpServletResponse response) throws ServletException, IOException
- String [getOwnerId](#) (HttpServletRequest request)
- String [getNickname](#) (HttpServletRequest request)
- void [executeUpdate](#) (String query) throws SQLException
- ResultSet [executeQuery](#) (String query) throws SQLException

5.18.1 Detailed Description

Servlet for executing the management of a notification.

5.18.2 Constructor & Destructor Documentation

5.18.2.1 NotificationManagementServlet()

```
homelibrary.servlets.NotificationManagementServlet.NotificationManagementServlet ()
```

Default constructor.

5.18.3 Member Function Documentation

5.18.3.1 processRequest()

```
void homelibrary.servlets.NotificationManagementServlet.processRequest (
    HttpServletRequest request,
    HttpServletResponse response) throws ServletException, IOException [protected]
```

Processes requests for both HTTP GET and POST methods.

Parameters

<i>request</i>	ervlet request
<i>response</i>	ervlet response

Exceptions

<i>ServletException</i>	if a servlet-specific error occurs
<i>IOException</i>	if an I/O error occurs

Reimplemented from [homelibrary.servlets.DSAServlet](#).

The documentation for this class was generated from the following file:

- C:/Users/user/Git/2024_DSA_S4_GWOZDZ/app/src/main/java/homelibrary/servlets/NotificationManagementServlet.java

5.19 homelibrary.servlets.NotificationServlet Class Reference

Inheritance diagram for homelibrary.servlets.NotificationServlet:

Public Member Functions

- [NotificationServlet](#) ()

Public Member Functions inherited from [homelibrary.servlets.DSAServlet](#)

- [DSAServlet](#) ()
- String [getServletInfo](#) ()

Protected Member Functions

- void [processRequest](#) (HttpServletRequest request, HttpServletResponse response) throws ServletException, IOException

Protected Member Functions inherited from [homelibrary.servlets.DSAServlet](#)

- void [doGet](#) (HttpServletRequest request, HttpServletResponse response) throws ServletException, IOException
- void [doPost](#) (HttpServletRequest request, HttpServletResponse response) throws ServletException, IOException
- String [getOwnerId](#) (HttpServletRequest request)
- String [getNickname](#) (HttpServletRequest request)
- void [executeUpdate](#) (String query) throws SQLException
- ResultSet [executeQuery](#) (String query) throws SQLException

5.19.1 Detailed Description

Servlet for managing notifications

5.19.2 Constructor & Destructor Documentation

5.19.2.1 NotificationServlet()

```
homelibrary.servlets.NotificationServlet.NotificationServlet ()
```

Default constructor.

5.19.3 Member Function Documentation

5.19.3.1 processRequest()

```
void homelibrary.servlets.NotificationServlet.processRequest (
    HttpServletRequest request,
    HttpServletResponse response) throws ServletException, IOException [protected]
```

Processes requests for both HTTP GET and POST methods.

Parameters

<i>request</i>	servlet request
<i>response</i>	servlet response

Exceptions

<i>ServletException</i>	if a servlet-specific error occurs
<i>IOException</i>	if an I/O error occurs

Reimplemented from [homelibrary.servlets.DSAServlet](#).

The documentation for this class was generated from the following file:

- C:/Users/user/Git/2024_DSA_S4_GWOZDZ/app/src/main/java/homelibrary/servlets/NotificationServlet.java

5.20 homelibrary.servlets.PublicationType Enum Reference

Public Attributes

- [BOOK](#)
- [JOURNAL](#)

5.20.1 Detailed Description

Enumeration type representing type of publication.

5.20.2 Member Data Documentation

5.20.2.1 BOOK

```
homelibrary.servlets.PublicationType.BOOK
```

Book.

5.20.2.2 JOURNAL

`homelibrary.servlets.PublicationType.JOURNAL`

Journal.

The documentation for this enum was generated from the following file:

- `C:/Users/user/Git/2024_DSA_S4_GWOZDZ/app/src/main/java/homelibrary/servlets/AddServlet.java`

5.21 homelibrary.servlets.RegisterServlet Class Reference

Inheritance diagram for `homelibrary.servlets.RegisterServlet`:

Public Member Functions

- [RegisterServlet](#) ()
- String [getServletInfo](#) ()

Protected Member Functions

- void [processRequest](#) (`HttpServletRequest request`, `HttpServletResponse response`) throws `ServletException`, `IOException`
- void [doGet](#) (`HttpServletRequest request`, `HttpServletResponse response`) throws `ServletException`, `IOException`
- void [doPost](#) (`HttpServletRequest request`, `HttpServletResponse response`) throws `ServletException`, `IOException`

5.21.1 Detailed Description

Servlet for registering a new user

5.21.2 Constructor & Destructor Documentation

5.21.2.1 RegisterServlet()

`homelibrary.servlets.RegisterServlet.RegisterServlet ()`

Default constructor.

5.21.3 Member Function Documentation

5.21.3.1 doGet()

```
void homelibrary.servlets.RegisterServlet.doGet (
    HttpServletRequest request,
    HttpServletResponse response) throws ServletException, IOException [protected]
```

Handles the HTTP GET method.

Parameters

<i>request</i>	servlet request
<i>response</i>	servlet response

Exceptions

<i>ServletException</i>	if a servlet-specific error occurs
<i>IOException</i>	if an I/O error occurs

5.21.3.2 doPost()

```
void homelibrary.servlets.RegisterServlet.doPost (  
    HttpServletRequest request,  
    HttpServletResponse response) throws ServletException, IOException [protected]
```

Handles the HTTP POST method.

Parameters

<i>request</i>	servlet request
<i>response</i>	servlet response

Exceptions

<i>ServletException</i>	if a servlet-specific error occurs
<i>IOException</i>	if an I/O error occurs

5.21.3.3 getServletInfo()

```
String homelibrary.servlets.RegisterServlet.getServletInfo ()
```

Returns a short description of the servlet.

Returns

a String containing servlet description

5.21.3.4 processRequest()

```
void homelibrary.servlets.RegisterServlet.processRequest (  
    HttpServletRequest request,  
    HttpServletResponse response) throws ServletException, IOException [protected]
```

Processes requests for both HTTP GET and POST methods.

Parameters

<i>request</i>	Servlet request
<i>response</i>	Servlet response

Exceptions

<i>ServletException</i>	if a servlet-specific error occurs
<i>IOException</i>	if an I/O error occurs

The documentation for this class was generated from the following file:

- C:/Users/user/Git/2024_DSA_S4_GWOZDZ/app/src/main/java/homelibrary/servlets/RegisterServlet.java

5.22 homelibrary.servlets.RemoveServlet Class Reference

Inheritance diagram for homelibrary.servlets.RemoveServlet:

**Public Member Functions**

- [RemoveServlet](#) ()
- String [getServletInfo](#) ()

Protected Member Functions

- void [processRequest](#) (HttpServletRequest request, HttpServletResponse response) throws ServletException, IOException
- void [doGet](#) (HttpServletRequest request, HttpServletResponse response) throws ServletException, IOException
- void [doPost](#) (HttpServletRequest request, HttpServletResponse response) throws ServletException, IOException

5.22.1 Detailed Description

Servlet for removing a book from the database

5.22.2 Constructor & Destructor Documentation

5.22.2.1 RemoveServlet()

```
homelibrary.servlets.RemoveServlet.RemoveServlet ()
```

Default constructor.

5.22.3 Member Function Documentation

5.22.3.1 doGet()

```
void homelibrary.servlets.RemoveServlet.doGet (  
    HttpServletRequest request,  
    HttpServletResponse response) throws ServletException, IOException [protected]
```

Handles the HTTP GET method.

Parameters

<i>request</i>	servlet request
<i>response</i>	servlet response

Exceptions

<i>ServletException</i>	if a servlet-specific error occurs
<i>IOException</i>	if an I/O error occurs

5.22.3.2 doPost()

```
void homelibrary.servlets.RemoveServlet.doPost (  
    HttpServletRequest request,  
    HttpServletResponse response) throws ServletException, IOException [protected]
```

Handles the HTTP POST method.

Parameters

<i>request</i>	servlet request
<i>response</i>	servlet response

Exceptions

<i>ServletException</i>	if a servlet-specific error occurs
<i>IOException</i>	if an I/O error occurs

5.22.3.3 `getServletInfo()`

```
String homelibrary.servlets.RemoveServlet.getServletInfo ()
```

Returns a short description of the servlet.

Returns

a String containing servlet description

5.22.3.4 `processRequest()`

```
void homelibrary.servlets.RemoveServlet.processRequest (
    HttpServletRequest request,
    HttpServletResponse response) throws ServletException, IOException [protected]
```

Processes requests for both HTTP GET and POST methods.

Parameters

<i>request</i>	servlet request
<i>response</i>	servlet response

Exceptions

<i>ServletException</i>	if a servlet-specific error occurs
<i>IOException</i>	if an I/O error occurs

The documentation for this class was generated from the following file:

- C:/Users/user/Git/2024_DSA_S4_GWOZDZ/app/src/main/java/homelibrary/servlets/RemoveServlet.java

5.23 homelibrary.servlets.RemovingServlet Class Reference

Inheritance diagram for homelibrary.servlets.RemovingServlet:

Public Member Functions

- [RemovingServlet](#) ()
- String [getServletInfo](#) ()

Protected Member Functions

- void [processRequest](#) (HttpServletRequest request, HttpServletResponse response) throws ServletException, IOException
- void [doGet](#) (HttpServletRequest request, HttpServletResponse response) throws ServletException, IOException
- void [doPost](#) (HttpServletRequest request, HttpServletResponse response) throws ServletException, IOException

5.23.1 Detailed Description

Servlet for executing the removal of a book.

5.23.2 Constructor & Destructor Documentation

5.23.2.1 RemovingServlet()

```
homelibrary.servlets.RemovingServlet.RemovingServlet ()
```

Default constructor.

5.23.3 Member Function Documentation

5.23.3.1 doGet()

```
void homelibrary.servlets.RemovingServlet.doGet (  
    HttpServletRequest request,  
    HttpServletResponse response) throws ServletException, IOException [protected]
```

Handles the HTTP GET method.

Parameters

<i>request</i>	servlet request
<i>response</i>	servlet response

Exceptions

<i>ServletException</i>	if a servlet-specific error occurs
<i>IOException</i>	if an I/O error occurs

5.23.3.2 doPost()

```
void homelibrary.servlets.RemovingServlet.doPost (  
    HttpServletRequest request,  
    HttpServletResponse response) throws ServletException, IOException [protected]
```

Handles the HTTP POST method.

Parameters

<i>request</i>	servlet request
<i>response</i>	servlet response

Exceptions

<i>ServletException</i>	if a servlet-specific error occurs
<i>IOException</i>	if an I/O error occurs

5.23.3.3 getServletInfo()

```
String homelibrary.servlets.RemovingServlet.getServletInfo ()
```

Returns a short description of the servlet.

Returns

a String containing servlet description

5.23.3.4 processRequest()

```
void homelibrary.servlets.RemovingServlet.processRequest (  
    HttpServletRequest request,  
    HttpServletResponse response) throws ServletException, IOException [protected]
```

Processes requests for both HTTP GET and POST methods.

Parameters

<i>request</i>	servlet request
<i>response</i>	servlet response

Exceptions

<i>ServletException</i>	if a servlet-specific error occurs
<i>IOException</i>	if an I/O error occurs

The documentation for this class was generated from the following file:

- C:/Users/user/Git/2024_DSA_S4_GWOZDZ/app/src/main/java/homelibrary/servlets/RemovingServlet.java

5.24 homelibrary.servlets.ReserveServlet Class Reference

Inheritance diagram for homelibrary.servlets.ReserveServlet:

Classes

- class **PublicationData**

Public Member Functions

- [ReserveServlet](#) ()
- String [getServletInfo](#) ()

Protected Member Functions

- void [processRequest](#) (HttpServletRequest request, HttpServletResponse response) throws ServletException, IOException
- void [doGet](#) (HttpServletRequest request, HttpServletResponse response) throws ServletException, IOException
- void [doPost](#) (HttpServletRequest request, HttpServletResponse response) throws ServletException, IOException

5.24.1 Detailed Description

Servlet for reserving a publication

5.24.2 Constructor & Destructor Documentation

5.24.2.1 ReserveServlet()

```
homelibrary.servlets.ReserveServlet.ReserveServlet ()
```

Default constructor.

5.24.3 Member Function Documentation

5.24.3.1 doGet()

```
void homelibrary.servlets.ReserveServlet.doGet (
    HttpServletRequest request,
    HttpServletResponse response) throws ServletException, IOException [protected]
```

Handles the HTTP GET method.

Parameters

<i>request</i>	servlet request
<i>response</i>	servlet response

Exceptions

<i>ServletException</i>	if a servlet-specific error occurs
<i>IOException</i>	if an I/O error occurs

5.24.3.2 doPost()

```
void homelibrary.servlets.ReserveServlet.doPost (  
    HttpServletRequest request,  
    HttpServletResponse response) throws ServletException, IOException [protected]
```

Handles the HTTP POST method.

Parameters

<i>request</i>	servlet request
<i>response</i>	servlet response

Exceptions

<i>ServletException</i>	if a servlet-specific error occurs
<i>IOException</i>	if an I/O error occurs

5.24.3.3 getServletInfo()

```
String homelibrary.servlets.ReserveServlet.getServletInfo ()
```

Returns a short description of the servlet.

Returns

a String containing servlet description

5.24.3.4 processRequest()

```
void homelibrary.servlets.ReserveServlet.processRequest (  
    HttpServletRequest request,  
    HttpServletResponse response) throws ServletException, IOException [protected]
```

Processes requests for both HTTP GET and POST methods.

Parameters

<i>request</i>	servlet request
<i>response</i>	servlet response

Exceptions

<i>ServletException</i>	if a servlet-specific error occurs
<i>IOException</i>	if an I/O error occurs

The documentation for this class was generated from the following file:

- C:/Users/user/Git/2024_DSA_S4_GWOZDZ/app/src/main/java/homelibrary/servlets/ReserveServlet.java

5.25 homelibrary.servlets.ReservingServlet Class Reference

Inheritance diagram for homelibrary.servlets.ReservingServlet:

Public Member Functions

- [ReservingServlet](#) ()
- String [getServletInfo](#) ()

Protected Member Functions

- void [processRequest](#) (HttpServletRequest request, HttpServletResponse response) throws ServletException, IOException
- void [doGet](#) (HttpServletRequest request, HttpServletResponse response) throws ServletException, IOException
- void [doPost](#) (HttpServletRequest request, HttpServletResponse response) throws ServletException, IOException

5.25.1 Detailed Description

Servlet for executing the reserving of a publication.

5.25.2 Constructor & Destructor Documentation

5.25.2.1 ReservingServlet()

```
homelibrary.servlets.ReservingServlet.ReservingServlet ()
```

Default constructor.

5.25.3 Member Function Documentation

5.25.3.1 doGet()

```
void homelibrary.servlets.ReservingServlet.doGet (  
    HttpServletRequest request,  
    HttpServletResponse response) throws ServletException, IOException [protected]
```

Handles the HTTP GET method.

Parameters

<i>request</i>	servlet request
<i>response</i>	servlet response

Exceptions

<i>ServletException</i>	if a servlet-specific error occurs
<i>IOException</i>	if an I/O error occurs

5.25.3.2 doPost()

```
void homelibrary.servlets.ReservingServlet.doPost (  
    HttpServletRequest request,  
    HttpServletResponse response) throws ServletException, IOException [protected]
```

Handles the HTTP POST method.

Parameters

<i>request</i>	servlet request
<i>response</i>	servlet response

Exceptions

<i>ServletException</i>	if a servlet-specific error occurs
<i>IOException</i>	if an I/O error occurs

5.25.3.3 `getServletInfo()`

```
String homelibrary.srvlets.ReservingServlet.getServletInfo ()
```

Returns a short description of the servlet.

Returns

a String containing servlet description

5.25.3.4 `processRequest()`

```
void homelibrary.srvlets.ReservingServlet.processRequest (
    HttpServletRequest request,
    HttpServletResponse response) throws ServletException, IOException [protected]
```

Processes requests for both HTTP GET and POST methods.

Parameters

<i>request</i>	servlet request
<i>response</i>	servlet response

Exceptions

<i>ServletException</i>	if a servlet-specific error occurs
<i>IOException</i>	if an I/O error occurs

The documentation for this class was generated from the following file:

- C:/Users/user/Git/2024_DSA_S4_GWOZDZ/app/src/main/java/homelibrary/srvlets/ReservingServlet.java

5.26 homelibrary.srvlets.SearchServlet Class Reference

Inheritance diagram for homelibrary.srvlets.SearchServlet:

Public Member Functions

- [SearchServlet \(\)](#)
- String [getServletInfo \(\)](#)

Protected Member Functions

- void [processRequest](#) (HttpServletRequest request, HttpServletResponse response) throws ServletException, IOException
- void [doGet](#) (HttpServletRequest request, HttpServletResponse response) throws ServletException, IOException
- void [doPost](#) (HttpServletRequest request, HttpServletResponse response) throws ServletException, IOException

5.26.1 Detailed Description

Servlet for searching publications.

5.26.2 Constructor & Destructor Documentation

5.26.2.1 SearchServlet()

```
homelibrary.servlets.SearchServlet.SearchServlet ()
```

Default constructor.

5.26.3 Member Function Documentation

5.26.3.1 doGet()

```
void homelibrary.servlets.SearchServlet.doGet (
    HttpServletRequest request,
    HttpServletResponse response) throws ServletException, IOException [protected]
```

Handles the HTTP GET method.

Parameters

<i>request</i>	servlet request
<i>response</i>	servlet response

Exceptions

<i>ServletException</i>	if a servlet-specific error occurs
<i>IOException</i>	if an I/O error occurs

5.26.3.2 doPost()

```
void homelibrary.servlets.SearchServlet.doPost (
    HttpServletRequest request,
    HttpServletResponse response) throws ServletException, IOException [protected]
```

Handles the HTTP POST method.

Parameters

<i>request</i>	servlet request
<i>response</i>	servlet response

Exceptions

<i>ServletException</i>	if a servlet-specific error occurs
<i>IOException</i>	if an I/O error occurs

5.26.3.3 getServletInfo()

```
String homelibrary.servlets.SearchServlet.getServletInfo ()
```

Returns a short description of the servlet.

Returns

a String containing servlet description

5.26.3.4 processRequest()

```
void homelibrary.servlets.SearchServlet.processRequest (  
    HttpServletRequest request,  
    HttpServletResponse response) throws ServletException, IOException [protected]
```

Processes requests for both HTTP GET and POST methods.

Parameters

<i>request</i>	servlet request
<i>response</i>	servlet response

Exceptions

<i>ServletException</i>	if a servlet-specific error occurs
<i>IOException</i>	if an I/O error occurs

The documentation for this class was generated from the following file:

- C:/Users/user/Git/2024_DSA_S4_GWOZDZ/app/src/main/java/homelibrary/servlets/SearchServlet.java
